

Deteriorating Patient Simulation Course

This one day course incorporates a series of information lectures, practical demonstrations and six hands-on simulated scenarios. It is delivered by an experienced faculty and utilises cutting edge simulation technology. It is targeted at doctors in training who are starting or about to start at the registrar level. This course will cover technical and non-technical skills and aims to improve the learner's ability to manage and recognise the deteriorating patient as part of a team. There are six scenarios, covering situations you are likely to encounter, and each learner will lead on one scenario. There is no formal assessment. Learners will receive a certificate of attendance that may be used for their e-portfolios.

Venue: Simulation Suite, Education centre, Elliott
Dynes Building, Royal Victoria Hospital Site

Time: 8.30am – 4.30pm

Target Candidates: CT2 and ST3 grade trainees

Cost: £50

No of spaces: 12

Contact: cresta.annett@belfasttrust.hscni.net

ian.wallace@belfasttrust.hscni.net

Aims

- Improve recognition of the deteriorating patient
- Improve recognition of abnormal physiology
- Improve management of abnormal physiology
- Increased confidence in managing sick patients

Objectives

- Recognition and management of a deteriorating patient
- Recognition of limitations of individual clinical skills
- Team-working
- Time management
- Decision making
- Communication skills

Course Schedule

8.30 Introduction

9.00 Scenario 1

10.00 Scenario 2

11.00 – 11.15 Tea-break

11.15 Scenario 3

12.15 Scenario 4

13.15 – 13.45 Lunch

13.45 Scenario 5

14.45 Scenario 6

15.45 Conclusion and review
